

# INTERBAY

SPACE SAVING  
BIKE RACK

**CONVENIENT:** Perfect for storing bikes in tight spaces like in front of a parking stall in the garage or on any wall where you want to store 1 to 2 bikes together.

**BIKE FRIENDLY:** Ample spacing between bikes avoids interference. Durable thermoplastic powder coating protects the rack and bikes from scratches.

**LOCKABLE:** Welded lock loops offer additional locking security and can be used with a U-lock or cable lock.

**SIMPLE:** Easy installation on any wood frame or concrete wall. Designed to be user friendly and space efficient while keeping bikes organized and secure.

Interbay space saving bike racks are the perfect economical solution for tight spaces such as apartments, condos or parking garages. Mount the rack on the wall in front of a parking space to neatly & securely store up to 2 bikes. The Interbay features a protective thermoplastic coating that helps protect bikes from getting scratched. Welded lock loops provide security when using a locking cable and/or U-lock.

**Notes:**

1 Thermoplastic powder coat is available in eight standard colors as well as custom colors and subject to minimum lot charges.
